Amend the specification at page 8, line 7, to delete the second occurrence of "one of the", as follows:

The computer system 100 is configured to implement processing steps wherein  
| at least one of the ~~one of the~~ Network Servers 106 or 108 receives user-specified  
criteria for obtaining information from a database, which may be, for example, data  
distributed in storage across the network or data located in a single data store.
